The **Software/Hardware Integration Lab (LISHA)** was founded in 1985 to promote research in the frontiers between hardware and software. Since then, it has dedicated considerable efforts to research in areas such as *computer architecture*, *operating systems*, *computer networks* and the related *applications*. Currently, the laboratory focuses on innovative techniques and tools to support the development of *embedded systems*.

LISHA is part of the recently created EMBRAPII Institute for Mobility Technologies (MOVE).

LISHA is **part of EMBRAPII MOVE**

LISHA is part of the recently created EMBRAPII Institute for Mobility Technologies (MOVE).

**LISHA is part of EMBRAPII MOVE**

LISHA hosted **SBESC 2021** and **LADC 2021**, the reference conferences of Computer Engineering and Dependability in Latin America.

**SBESC 2021 and LADC 2021**

A new version of OpenEPOS has been released! Check the *new features*.

**Open IoT Platform**

**EPOS 2.2**

**LISHA's IoT Platform** now supports dozens of research projects. For further information about how to join it, please check this link.

**LISHA's IoT Platform**

**SmartData**

A new version of **LISHA's IoT Platform** based on SmartData and the Trustfull Space-Time Protocol (TSTP) is now available!

**SmartData**

**SmartX**

**LISHA's CPS Management Platform** is now fully integrated with the *IoT Platform*, adding features such as defect tracking, logging, geolocation, and service ticketing.

**SmartX**

**LISHA is a founding member of UFSC’s Research Center for Cyber-physical Systems Security (SecCPS).**

LISHA is a founding member of UFSC’s Research Center for Cyber-physical Systems Security (SecCPS).

**UFSC SecCPS**

**OBNZip**

LISHA and **LVA** are working together to make Ocean Bottom Nodes more intelligent. We will build a multidisciplinary team to develop advanced compression algorithms and machine learning models to handle submarine seismic signals. Check the *open positions* and join us on this journey.

**SmartX**

**LISHA and Renault** are joining forces to develop innovative solutions for the automotive industry in the realm of **Program Rota 2030**. Prof. Giovani Gracioli will lead a team of experts at LISHA on the pursuit of an Intelligent Data Acquisition and Analysis System for Automotive Controllers.

**LISHA and Renault**

**ROTA 2030**

**LISHA and AQTech for Smart Energy**

**LISHA and AQTech** are working together to make hydroelectric power generators more intelligent. Prof. Fröhlich will lead a multidisciplinary team to develop advanced tools for predictive maintenance of large hydroelectric generators.
MCTIC's IA² Program

LISHA is now part of MCTIC's IA² Program. Prof. Gustavo Medeiros de Araújo will be working together with accelerators HARDs and DARWIN and SOFTEX to support startups while innovating with AI solutions to real problems.
