We are hiring! Check the positions currently open here!

The **Software/Hardware Integration Lab (LISHA)** was founded in 1985 to promote research in the frontiers between hardware and software. Since then, it has dedicated considerable efforts to research in areas such as **computer architecture**, **operating systems**, **computer networks** and the related applications. Currently, the laboratory focuses on innovative techniques and tools to support the development of **embedded systems**.

**LISHA is part of EMBRAPII MOVE**

LISHA is part of the recently created EMBRAPII Institute for Mobility Technologies (MOVE).

**SBESC 2021 and LADC 2021**

LISHA hosted SBESC 2021 and LADC 2021, the reference conferences of Computer Engineering and Dependability in Latin America.

**OpenEPOS 2.2**

A new version of OpenEPOS has been released! Check the new features.

**IoT Platform**

LISHA's IoT Platform now supports dozens of research projects. For further information about how to join it, please check this link.

**SmartData**

A new version of LISHA's IoT Platform based on SmartData and the Trustfull Space-Time Protocol (TSTP) is now available!

**LISHA is part of SecCPS**

LISHA is a founding member of UFSC's Research Center for Cyber-physical Systems Security (SecCPS).

**OBNZip**

LISHA and LVA are working together to make Ocean Bottom Nodes more intelligent. We will build a multidisciplinary team to develop advanced compression algorithms and machine learning models to handle submarine seismic signals. Check the open positions and join us on this journey.

**Rota 2030 with Renault**

LISHA and Renault are joining forces to develop innovative solutions for the automotive industry in the realm of Program Rota 2030. Prof. Giovani Gracioli will lead a team of experts at LISHA on the pursuit of an Intelligent Data Acquisition and Analysis System for Automotive Controllers.
**SmartX**

*lisha’s CPS Management Platform* is now fully integrated with the *IoT Platform*, adding features such as defect tracking, logging, geolocation, and service ticketing.

---

**LISHA and AQTech for Smart Energy**

LISHA and *AQTech* are working together to make hydroelectric power generators more intelligent. *Prof. Fröhlich* will lead a multidisciplinary team to develop advanced tools for predictive maintenance of large hydroelectric generators. [Read more ...]

**MCTIC’s IA² Program**

LISHA is now part of *MCTIC’s IA² Program*. *Prof. Gustavo Medeiros de Araújo* will be working together with accelerators *HARDS* and *DARWIN* and *SOFTEX* to support startups while innovating with AI solutions to real problems.
