

The **Software/Hardware Integration Lab (LISHA)** was founded in 1985 to promote research in the frontiers between hardware and software. Since then, it has dedicated considerable efforts to research in areas such as *computer architecture, operating systems, computer networks* and the related *applications*. Currently, the laboratory focuses on innovative techniques and tools to support the development of *embedded systems*.

LISHA is part of the recently created **EMBRAPII Institute for Mobility Technologies (MOVE)**.

LISHA is part of **EMBRAPII MOVE**

SBESC 2021 and LADC 2021

LISHA hosted **SBESC 2021** and **LADC 2021**, the reference conferences of Computer Engineering and Dependability in Latin America.

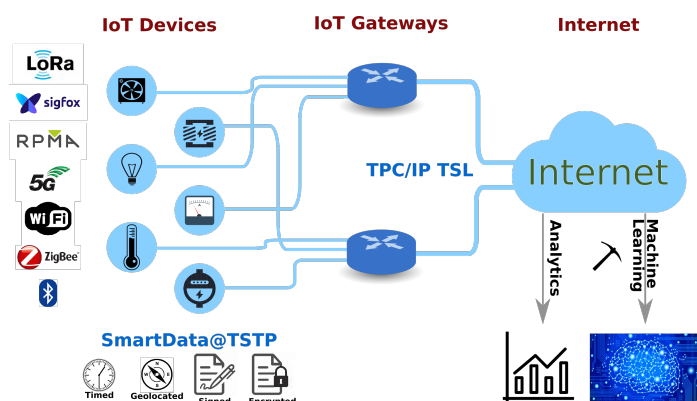

A new version of OpenEPOS has been released! Check the [new features](#).

Open IoT Platform

EPOS 2.2 LISHA's **IoT Platform** now supports dozens of research projects. For further information about how to join it, please check [this link](#).

SmartData

A new version of **LISHA's IoT Platform** based on SmartData and the Trustfull Space-Time Protocol(TSTP) is now available!

SmartX

LISHA's **CPS Management Platform** is now fully integrated with the **IoT Platform**, adding features such as defect tracking, logging, geolocation, and service ticketing.

LISHA is a founding member of UFSC's **Research Center for Cyber-physical Systems Security (SecCPS)**.

UFSC SecCPS LISHA is part of **SecCPS**

OBNZip
LISHA and **LVA** are working together to make Ocean Bottom Nodes more intelligent. We will build a multidisciplinary team to develop advanced compression algorithms and machine learning models to handle submarine seismic signals. Check the [open positions](#) and join us on this journey.

Rota 2030 with Renault

LISHA and **Renault** are joining forces to develop innovative solutions for the automotive industry in the realm of **Program Rota 2030**. **Prof. Giovani Gracioli** will lead a team of experts at LISHA on the pursuit of an Intelligent Data Acquisition and Analysis System for Automotive Controllers.

LISHA and AQTech for Smart Energy

LISHA and **AQTech** are working together to make hydroelectric power generators more intelligent. **Prof. Fröhlich** will lead a multidisciplinary team to develop advanced tools for predictive maintenance of large hydroelectric generators. [Read more ...](#)

MCTIC's IA² Program

LISHA is now part of [MCTIC's IA² Program](#). [Prof. Gustavo Medeiros de Araújo](#) will be working together with accelerators [HARDS](#) and [DARWIN](#) and [SOFTEX](#) to support startups while innovating with AI solutions to real problems.
